

# New Year Prompts [by Hillel IT School]

Хо-хо-хо 🎄🤖 Схоже, ви щойно вихопили свій новорічно-АІшний бонус ✨

Далі – добірка найтрендовіших новорічних промтів, які можна (і треба 😊) кастомізувати під себе, свій бренд або бізнес. Міксуйте стилі, міняйте деталі, експериментуйте – АІ це любить.

А коли зловите той самий вау-результат – не тримайте його в шухляді 📁  
Діліться у соцмережах і тегайте [@hillel\\_itschool](https://www.instagram.com/hillel_itschool) – нам буде дуже приємно побачити вашу АІ-творчість та підсвітити найкрутіші роботи 🍷

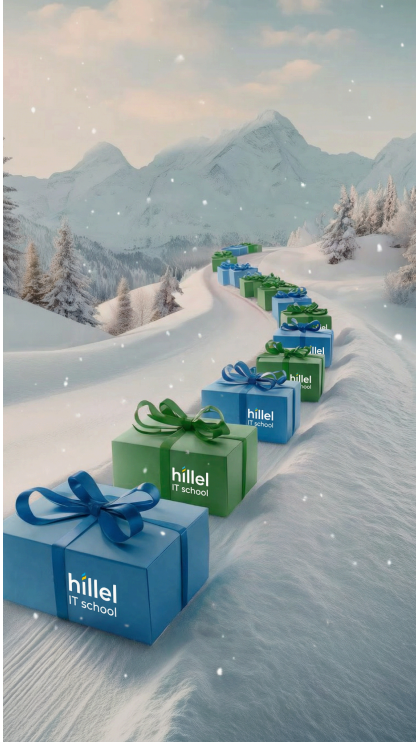

Гарного креативного святкового настрою & хай АІ працює на вас 🤖✨

A Grinch-like green furry character, mischievous smile, sitting casually on top of a stacked pyramid of blue and green shopping bags. The bags feature the Hillel IT School logo, clean, minimal, centered, no other branding. Studio white background, premium product photography, soft shadows, realistic fur texture, cinematic lighting, ultra-detailed materials. Festive Christmas mood, but modern and minimal. Not an exact movie character, original stylized design.

Create a premium transparent glass Christmas ornament hanging on a real pine tree branch. Inside the ornament, the Hillel IT School logo is formed from fully three-dimensional glass letters, not printed or flat. Each letter is made of solid clear glass with visible thickness, beveled edges, realistic refraction, internal reflections and light dispersion. The letters float naturally inside the ornament. Ultra-realistic glass physics, realistic highlights, soft bokeh Christmas lights in the background, shallow depth of field, studio-quality lighting, macro product photography. No text, no decals, no flat logo, no extra decorations.

A cinematic winter landscape with a winding snow path through snowy mountains and pine trees. Along the path, a row of gift boxes alternating in color — blue, then green, then blue, then green. Each box is minimal and elegant, wrapped with a ribbon, and features only the Hillel IT School logo, clean and centered, no other text. Soft pastel winter lighting, gentle snowfall, realistic snow texture, shallow depth of field, ultra-realistic photography, premium holiday atmosphere.

A premium keychain with multiple three-dimensional Christmas charms attached to a metal ring. The charms include: a red holiday horse figurine, a green Christmas tree, and a Hillel IT School logo charm. All elements are fully three-dimensional, solid, glossy, and realistic, not printed or flat. The logo is an embossed or solid 3D emblem, clean and centered. Studio product photography, soft festive lighting, shallow depth of field, ultra-realistic materials, cozy Christmas mood.

A premium glass snow globe on an elegant base, filled with gently falling snow. Inside the globe are multiple gift boxes featuring the Hillel IT School logo, clean, minimal, and centered on each box. No other text or branding. Realistic glass thickness, refraction, reflections, and snow particles. Soft winter lighting, shallow depth of field, ultra-realistic product photography, cozy Christmas atmosphere.

No extra text, no slogans, no other logos, no warped branding, no flat decals outside the boxes.

An anthropomorphic computer mouse device standing upright like a character, wearing a cozy winter jacket and knitted beanie hat, surrounded by festive Christmas decorations. The Hillel IT School logo is engraved directly into the mouse body, not printed or painted. Visible engraved grooves, carved lettering, subtle depth, realistic shadows inside the engraving, matte surface around the logo. Premium product photography, soft warm holiday lighting, shallow depth of field, ultra-realistic materials.

Create a premium gift box scene with an open elegant box. Inside the box lies a gift certificate card featuring only the Hillel IT School logo, perfectly centered, clean and minimal. No text, no numbers, no branding except the logo. Luxury presentation, soft festive lighting, subtle golden bokeh, cinematic depth of field, realistic materials, studio-quality product photography, dark green and gold color palette, ultra-detailed.

Use the provided Hillel IT School logo as the exact base shape and proportions.  
Transform the logo so it is fully constructed from elegant Christmas greenery.  
The logo letters are formed from dense pine branches and fir needles, following the original logo contours precisely.  
Decorate the greenery with subtle warm fairy lights, small red and gold ornaments, pinecones, and minimal festive details.  
The lights softly glow, creating a premium holiday atmosphere.  
The logo is mounted on a minimal black metal stand, centered on a wooden surface.  
Background is dark, clean, and minimal, with soft bokeh hints of a cozy interior and holiday decor.

main the logo's real identity, correct proportions

# IT school

Vertical composition. A miniature winter village made entirely in a knitted yarn style.

In the center stands a cozy knitted office building of Hillel IT School, with the Hillel IT School logo clearly visible on the facade and above the entrance.

Warm yellow light glows softly from the large knitted windows, revealing tiny yarn people inside working on laptops, studying, and collaborating.

Around the office: small knitted houses, snow-covered knitted trees, festive knitted lanterns with warm light, and decorative holiday garlands.

Tiny yarn people walk through the village, some carrying laptops and backpacks, and small knitted cars move along the snowy street.

A welcoming knitted entrance area with a small signboard near the door, subtle winter decorations, and a calm educational atmosphere.

Soft wool textures, handcrafted look, warm lighting, shallow depth of field, highly detailed knitted diorama, premium miniature aesthetic.

Replace the object in Santa Claus's hand with a modern open laptop.

The laptop is held naturally in Santa's gloved hand, matching the original hand position and perspective.

On the laptop screen, display the Hillel IT School logo clearly and correctly, centered and undistorted.

Keep Santa Claus exactly the same: same pose, facial expression, clothing, lighting, and proportions.

Preserve the dramatic cinematic scale where Santa appears giant compared to the city.

The laptop should look realistic and premium, with subtle reflections on the screen.

The screen glow softly illuminates Santa's glove and nearby area.

Maintain the original background, architecture, winter atmosphere, snowfall, and cinematic lighting.

Ultra-realistic, high detail, professional advertising visual.

No extra text, no additional branding, no changes to Santa or the environment.
